

## Checklist: Well prepared for your journey

We have compiled a checklist of everything you need to know for your journey in times of Corona. You can also download this list as a PDF and print it.

### Important information for your journey at a glance

#### **Entry requirements and quarantine obligations**

Please familiarise yourself with the general entry requirements (e.g. passport and visa) as well as the necessary Corona entry documents (e.g. test certificate). Please check whether you meet the requirements for your destination, transit country and return journey, and find out about any possible quarantine obligations. Simply enter your departure and destination airport at the following link.

#### **Vaccination**

Being vaccinated against Covid-19 can make your journey considerably easier. Make sure you have your vaccination certificate on you at all times and check whether further vaccinations are required for your destination.

#### **Digital vaccination certificate**

If you have a digital vaccination certificate, keep it on you at all times.

#### **Information about Corona testing**

Find out about the testing possibilities at your destination and the requirements concerning the test result. You may have to be tested both before your outbound journey and before your return journey.

#### **Booking your Corona test**

On the day of travel, make your way to your flight in a relaxed manner and take advantage of our „Test, Drop & Fly“ service. This allows you to take care of the necessary corona test and baggage check in advance.

#### **Corona-related travel documents**

Check which corona-related documents are required for your destination (e.g. negative test result, vaccination certificate, DEA, or others).

#### **Digital document check**

Have your corona-related documents checked in advance on selected routes. This way you will know early on if your documents are complete and correct and can confirm this to us when you check-in online or from your mobile device.

**Face mask requirement**

You are still obliged to wear a face mask on all Lufthansa flights. Pack your personal protection items and toiletries, such as extra face masks, sanitiser etc., in your carry-on baggage. On longer flights, make sure you have several face masks with you and observe the allowance for liquids in carry-on baggage (max. 100 ml).

**Travel insurance**

To enjoy even more certainty in planning your journey, find out about our additional Covid-19 services.

**Digital self-services**

Ideally, use our digital self-service options and plan enough time at the airport.

**Lufthansa app**

Download the Lufthansa app and stay informed at all times. Keep your contact details up-to-date in case we have to contact you.

## Good to know

- It's not only the entry requirements that can differ depending on your destination country. Different regulations may also apply to your **connecting flight**. Obtain information from all the airlines you are travelling with.
- Increased checks can lead to **longer waiting times** at the airport. Find out in advance by consulting your departure airport's website and allow more time than usual for departure and after landing.
